

BURKETT'S

POOL PLASTERING, INC.

Replastering • Remodeling

There are many benefits when teaming up with a highly experienced, fully staffed swimming pool remodeling company...

THE BURKETT'S POOL PLASTERING TEAM

National Plaster Council Member

- Sitting on the Board of Directors, Owner Rob Burkett and Vice President of the Plaster Division, Shaun Goldberg
- Named two time "Member of the Year" by the National Plaster Council — highly respected
- Rob Burkett co-chairs the Research Committee of the National Plaster Council
- Rob Burkett sits on the Advisory Board and the Foundation Board of the National Pool Industry Research Center, located at Cal Poly University, San Luis Obispo
- On the cutting edge of latest technology of pool finishes, material, and water chemistry, which is in-turn passed on to our homeowners
- Employees who have a passion for what they do and who are dedicated to the homeowners we work with

REMODEL DEPARTMENT

Ten highly trained Sales Consultants and one Design Consultant to meet your major remodel needs. This includes re-plumbs, new skimmers, splitting main drains to safeguard against entrapment and benefiting the homeowner with eco-friendly and energy efficient equipment, using state-of-the-art automation, controls, and technology.

All Work Done In-House / Plaster, Masonry, Gunite, Decks, Equipment, Plumbing, Electrical, Demo, Prep, and Start-up

Each project phase is scheduled in-house, giving the homeowner the benefit of no sub-contractor to interact with and having direct contact with one of five Project Managers having over 104 years of total combined swimming pool construction experience.

- Our homeowners gain the combined benefits of a frilly staffed, highly experienced remodel department.
- The homeowner can rest assured that the Burkett's Team will guide them through the County Code maze as we have a wealth of knowledge concerning your local County Building and Environmental Health Department Codes.
- Additionally, the homeowner will benefit from the special attention to detail, knowledge, experience, and the pride of craftsmanship on their project that they both expect and deserve.

- All of this, combined with 20 years of experience, will make for a positive and pleasurable experience with Burkett's Pool Plastering.

PLASTER

Top Finishers in Industry

- Employees very passionate about the company and quality and in return the homeowner will benefit an extremely high quality finish product
- Experienced teams shoot plaster, pebble, and quartz finishes in a thicker layer and more uniform, compared to other companies
- Hard trowel and wash pebble surfaces twice for harder, smoother finish vs. other finishers at other companies that only do this once
- Top Paid with full medical benefits, our finishers are treated with the utmost dignity and respect
- Virtually no employee turn-over
- Five of the finest plaster and pebble crews within the industry
- At Burkett's Pool Plastering, we feel that the most important components in a high-end quality finish are the excellent collection of materials used, along with the top rated applicator himself We truly believe at Burkett's Pool Plastering that we have the finest applicators the industry has to offer.

COMMERCIAL TILE

Largest Commercial Swimming Pool Plaster and Tile Sub-Contractor in Northern California

- Entrusted by five of the largest, most respected, commercial general contractors in the State of California, to do the "Lion's Share" of all plaster and tile work on major Universities, High Schools, Swim Clubs, Community Pools, Aquatic Centers, Theme Parks, Hotels, and Health Clubs in Northern California as well as Southern California

MATERIALS

Uses Top Materials Available in the Industry

- Wet Edge Technologies — The New Generation of Pebble Finishes
- Pearl and Satin Pebble Finishes, Polished Primera Stone, and Altima Finishes with Polymers and Pozzolans
- Inorganic dye (mineral based dye, which lasts longer) vs. Organic based dye, (shorter life and tends to fade and break down) separates Burkett's Pool Plastering from its' competitors
- 3-M Colorquartz, the industry leader in quartz finishes
- Combining these superior materials with Burkett's top finishers, homeowners will benefit from the finest quality finishes in the industry.

DECKS

Top Finishers

- Burkett's Pool Plastering specializes in stamped, exposed aggregate, salt, and broom finished decks
- Hard trowelled twice, not once like most companies, which gives the benefit of a harder and more durable surface, which in turn lasts longer for the homeowner
- Rebar and road base used for the benefit of structural reinforcement and strength
- We add fiber mesh for the benefit of reducing cracking and check cracking on concrete finishes
- All stamped decks are done at a drier stage which gives the homeowner the benefit of a more uniform stamped surface
- Top paid finishers with full medical benefits; which in return draw the finest, most experienced finishers in the industry.

MASONARY

Top Masons in the Industry

- Specialized crew for each phase: Tile, Waterfalls, and Rockwork which benefits the homeowner by receiving a crew that is specialized in their particular masonry phase
- Foremen have an average of 15 years experience which bring the benefits of the greatest expertise and craftsmanship to the Homeowner
- The largest commercial swimming pool tile division in Northern California
- Entrusted by five of the largest commercial swimming pool general contractors in the State of California to do the "Lion's Share" of all plaster and tile work on major Universities, High Schools, Swim Clubs, Community Pools, Aquatic Centers, Theme Parks, Hotels, and Health Clubs in Northern California as well as Southern California.
- Fully staffed Masonry division with Department Head and Assistant, as well as Secretary, with 11 Masonry crews.
- Homeowner will benefit from the utmost special attention to detail, knowledge, and pride of craftsmanship from masonry crews and department staff

GUNITE

Department Head with Thirty Years of Swimming Pool Construction Experience and Three Crews to Do All In-House Gunite Projects

- Gunite phase scheduled in-house giving the homeowner the benefit of no sub-contractors to interact with and knowing who to contact if they have any questions.
- The Gunite Department establishes specific specs for notched beams, steps, benches, waterfall and rock notches, raised

- elevations, benefiting the homeowner with both the gunite and tile departments working hand-in-hand to allow for a smooth transition from one phase to the next.
 - a. Modify or reconfigure shape or size of pool
 - b. Add spa or change spa elevation
 - c. Shallow pool
 - d. Add Acapulco bench, deep end steps, benches and swim-outs
 - e. Gunite wing walls, seat walls, landscape retaining walls, fire pits, and planters

START-UP AND SERVICE DEPARTMENT

Start-Up on all re-plastered pools, with initial chemicals for start-up

- Written instructions as well as verbal instructions for start-up of swimming pool
